- Weiterbildung - über 1000 Personen jährlich

**Střední odborná škola zahradnická  
a Střední odborné učiliště Rajhrad**

On 26.04. we had a girls day in our company. That means, that 6 girls from 11-13 years came to the company and looked in the works what the gardeners are doing. That was a very interesting day for us and we find out some new things!

We thought that we will do here different works, but they are the same how in Lettland. Only some things were different, for example, the ways how to bind a tree to a stick and other things. Here are a lot of trees and flowers that we do not have in Lettland.

We liked to live and work here. Germany is a really nice country were lives friendly people 😊

Those two and a half weeks, we were with the team who is taking care of the maded gardens. The boss of this team is Monique Daumichen, a very nice and friendly person 😊

Thanks to everyone who taught me everything of whom were able to learn thanks to colleagues with whom I worked at this time. Many thanks to the family where I live this time and I spent with them and also about the possibility of practice to spend time in Germany.
